Market for Open source technologies

PHP - the language of choice for software projects in Colleges and Industry, which is endorsed by Google, Infosys, Wipro etc. The technical workforce for Linux/PHP has increased manifold in the last few years, which is just the tip of the iceberg. As the trained technical workforce meets only 1/3rd of the Linux/PHP jobs at present, the future is bright for Open Source enthusiasts.

**Don't miss. Come learn from Kgisl the masters of open source technologies
with over 8 years experience in developing applications on PHP.**
